## EXPERIENCE

### Delhivery

Software Developer

Gurugram, India

Oct 2025 – Present

- Architected and scaled a distributed **HRMS Platform** serving **300K+ employees** across onboarding, attendance, leave, payroll, and workforce lifecycle management, reducing onboarding turnaround time by **60%**.
- Designed and implemented an **event-driven microservices architecture** using **Python, Kafka, Redis, MySQL, MongoDB, and AWS**, enabling reliable asynchronous communication, fault isolation, and independent service scaling across HRMS domains.
- Built **CDC-driven data synchronization pipelines** using **Debezium, MySQL Binlogs, and Kafka**, streaming workforce, roster, leave, and attendance updates across LMS, UMS, Oracle HRMS, and downstream systems with near real-time consistency.
- Engineered highly reliable distributed workflows using **Consumer Groups, DLQs, Retry Policies, Idempotent Processing, Event Replay, Partition Scaling, and Offset Management**, improving fault tolerance and ensuring resilient event processing under production workloads.
- Led critical platform initiatives including **zero-downtime migrations, PII encryption, VAPT remediation, audit logging, production monitoring, and observability enhancements** and operational reliability.

### FinxBridge

Software Development Engineer -1

Hyderabad, India

Jan 2025 – Oct 2025

- Designed and developed backend systems for **HDFC Forex Card** and **VISA** payment workflows using **Node.js, MongoDB, Kafka, and Distributed Systems**, supporting scalable transaction processing and banking integrations.
- Implemented **JWT Authentication, AES Encryption, Transaction Validation**, and adapter-based integrations with external banking partners through **REST and SOAP APIs**.
- Built **event-driven workflows** using **Kafka** with asynchronous messaging, idempotent transaction processing, retry handling, and resilience patterns to improve reliability of distributed financial systems.
- Optimized **MongoDB performance by 35%** through indexing, aggregation tuning, query optimization, and pagination while supporting production debugging, UAT validation, and release automation using **ArgoCD**.

### Anirvana Pvt. Ltd.

Software Developer

Hyderabad, India

Jul 2023 – Dec 2024

- Built and scaled an **EdTech CRM platform** using **Django, React, PostgreSQL, and AWS**, delivering Enquiry, Appointment, User Management, and Accounts modules, improving lead management efficiency by **30%**.
- Designed **REST APIs**, database schemas, workflow automation, and a configurable **Form Builder**, reducing manual operations and enabling non-technical teams to manage admission workflows independently.
- Architected and maintained **QA and Production environments** on **AWS EC2, S3, Nginx, and Gunicorn**, implementing deployment automation and scalability best practices to support reliable production workloads.
- Containerized applications using **Docker** and implemented **CI/CD pipelines** with **AWS CodePipeline** and **CodeDeploy**, reducing deployment effort by **80%**, improving release reliability, and accelerating feature delivery.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, C++, SQL

**Frontend:** React.js, Redux, Material UI (MUI), HTML5, CSS3

**Backend:** Django, Flask, Sanic, Node.js, Express.js, REST APIs, Kafka, Microservices

**Databases:** PostgreSQL, MySQL, MongoDB, Redis

**Cloud & DevOps:** AWS, Docker, Kubernetes, CI/CD, Nginx, Gunicorn

**Testing & Quality:** Pytest, Unit Testing, API Testing

**Architecture:** Distributed Systems, Event-Driven Architecture, System Design

## EDUCATION

Greater Noida Institute of Technology

Bachelor of Technology in Information Technology

Greater Noida, India

Jul 2019 – Jun 2023
